

Handle

Smart easy handle

In terms of structure installed by dividing the previous locking device and handle, Smart Easy handle is **extremely convenient product in the installing construction** as the patent registered technology realizing **the unification of handle and locking device first in the business world** through the steady research development of CS Tech Co., Ltd.

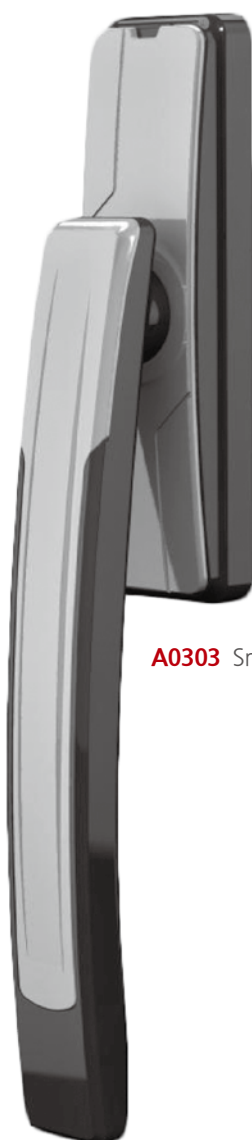

- The constructability is extremely good as the integral structure of locking device and handle.
- The construction is convenient without division of left and right.
- The durability is high with the smooth action of handle lever.
- It is well matched to any windows and doors as the design is simple.
